“The Economic Report” show to feature Clinical Resources, LLC

June 16, 2010, Deerfield Beach, FL – The producers of **The Economic Report** are pleased to announce that *Clinical Resources, LLC* will be featured in an upcoming episode on *Staffing Solutions for the Healthcare Industry* as part of the show's *Medical Minutes* series.

An increased shortage of nurses and other medical professionals and a growing population of aging Baby Boomers, are just a couple of the challenges that America's healthcare facilities are facing these days. As a result, many hospitals, skilled nursing and assisted living facilities across the nation are seeking assistance from staffing companies. From covering personnel during vacation and personal leave to filling a short-term position, there's a great demand for temporary and interim professionals in the healthcare industry.

Headquartered in Atlanta, Georgia, Clinical Resources places experienced professionals in temporary and interim positions in hospitals, skilled nursing and assisted living facilities across the country. Nurse owned and operated, the company is committed to providing consistent and predictable results.

"All of our professionals are highly competent with numerous years of multi-state experience," says Clinical Resources President and CEO, Jennifer L. Scully RN CCM NHA. "They are qualified to assist health care facilities with the implementation of new systems or to sustain current systems to ensure quality care."

The five-minute feature, which was filmed on location in Atlanta, Georgia, addresses the temporary staffing needs of America's healthcare facilities. It also addresses how these needs are being met, and includes interviews with healthcare providers and interim nurses as well as representatives from Clinical Resources.
